

Maxor provides services relating to specialty injectables and certain respiratory therapies through its subsidiary IVSolutions. IVSolutions, a specialty pharmacy, has been providing home infusion and specialty injectables since 1986. This Specialty Injectables Program will benefit you, the patient, while at the same time help contain the costs of expensive medications. IVSolutions will be working in conjunction with members of the County-City Employee Pharmacy Program to fill their medications through this program. *See "Specialty Medication List by Diagnosis/Condition" on reverse side of this page for a full list of these medications.*

IVSolutions offers several advantages when it comes to specialty medications:

- Extensive Product Knowledge
- Patient Training (for self administration)
- Home Delivery
- Proactive Refill Process
- Monitoring Patient Response to the Therapy
- Partial Box Quantities

If you are currently receiving any of the specialty medications listed on the reverse side of this page, or are being treated for any of the listed diagnosis, IVSolutions will be sending you a form in the mail. If you have any questions, please call **1-800-658-6046** to speak with an IVSolutions Customer Service Representative.

At Maxor, we are committed to providing high quality, cost effective prescription coverage. We are constantly looking at ways to better serve our members and to manage the increasing costs of prescription drugs. Through IVSolutions, we will be able achieve both of these goals.

Sincerely,

Maxor
