

THE CITY OF COLORADO SPRINGS
and the
PIKES PEAK RURAL
TRANSPORTATION AUTHORITY

The City of Colorado Springs is accepting *PROPOSALS* at the City Contracts Office, 30 South Nevada Ave., Suite 201, Colorado Springs, Colorado, for the following project:

SOLICITATION NUMBER: **R09-T074 LJ**

PROFESSIONAL SERVICES: **FILLMORE STREET TRAFFIC ANALYSIS STUDY**

UNIT: **PW/TRAFFIC ENGINEERING/PPRTA**

DESCRIPTION: **FILLMORE STREET TRAFFIC ANALYSIS AND CORRIDOR STUDY SINTON – CENTENNIAL.** Conduct a transportation study along the Fillmore Street corridor from Sinton Road west to Centennial Boulevard for the Pikes Peak Rural Transportation Authority (PPRTA) and the City of Colorado Springs. The project will include a process to ascertain access and geometric improvements needed for the Fillmore Street Design project. Sub-area analysis is also needed to determine the benefits that the extension of Centennial Boulevard from Fillmore Street south to Interstate 25 would have on the Fillmore Street corridor. This analysis is necessary to develop interim improvements for the Fillmore Street/Chestnut Street/Interstate 25 off-ramp intersection prior to the interchange being reconstructed. Sub-area analysis will utilize the Pikes Peak Area Council of Governments travel demand model (VISSUM) and VISSIM traffic analysis software for key model years. The analysis will review four alternatives for Centennial Boulevard: no build; Centennial Boulevard extended to Van Buren Street; construction of two lanes of Centennial Boulevard from the existing terminus to the interstate; and full construction of the 4-lane arterial street for the same section. Of particular concern with the phased construction is whether an extension to Van Buren Street would encourage neighborhood cut-through traffic in which mitigating strategies will need to be developed.
